

Homework Menu

Spring Term

Dosbarth Blodeuwedd

First course

Complete these regularly

- Read school reading books and for pleasure, Welsh and English, weekly.
- Practice your joined handwriting.
- Learn and practice times tables up to 12.
- Practice spelling key vocabulary.

Theme: Grow and Thrive

Main Course

Choose 4 to complete of the term:

- Research different plants that grow around the world. How do they survive in their habitats? Show your research any way you want e.g poster, PowerPoint, fact file.
- Can you grow something at home? What conditions does it need to grow? Why not measure the plant weekly and record data on GoogleSheets?
- Different foods grow in different countries. Can you show where different foods grow on a map of the world? What makes that country a suitable place for the food to grow?
- Why not create a diagram showing the process of plant reproduction? Remember to label using scientific vocabulary: stigma, columnar, ovary, stamen, anther, filament, dispersal, pollination, germination/bud.
- We use energy from food to move. Look at different foods in the house and compare the energy (calories) they give us. You can create a graph or table to show your findings.

Dessert

Optional to complete throughout the term.

- Create a piece of art inspired by things that grow.
- Research Andy Warhol's work and create your own piece of 'PopArt'.
- Create an animation with the title 'Grow and Thrive'. You can choose what to create.
